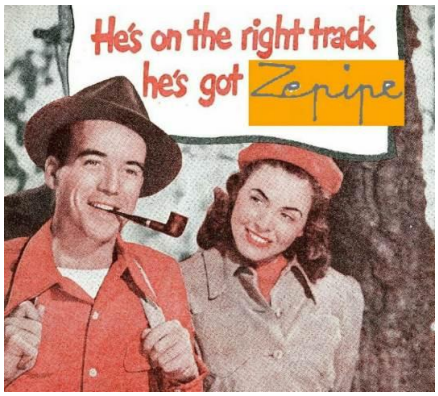
Zepipe
Diana – DNA40



1/ Installing battery

Insert 18490 or 18500 battery - positive side down
Adjust the screw – slightly over battery top level
Put magnet on the top of the battery – negative side
Put topper on magnet – it will touch the screw too
Remove topper to adjust the screw if necessary

2/ Starting to vape

Atomizer resistance between 0.2 and 2.0 ohms, typically 0.5.

To activate & vape: press centre button - "fire"
To decrease power: left button – "down"
To increase power: right button – "up"

3/ Controlling DNA40 menu

Please refer to Evolv instructions for full details, and mainly to manage coil temperature:

...Wear the Best to Look Your Best
BE A WINNER!
Regardless of your age, a truly fine hairpiece can do wonders for your appearance and morale. May we suggest a Samson's permanent-base hairpiece that won't fade, kink, tear or lose its shape. Sleep, swim, shower while wearing it—this is the one hairpiece you can enjoy with complete confidence. Forget the badly made ones you may have seen ... a Samson Hairpiece is everything we promise.
Finest quality hair pieces
